

POLAR KRAFT TX 175 PRO BASS SERIES

Bass Series TX 175 PRO built to give Fish Heads maximum performance, storage, and casting space in a bass boat

Designed with a wide bow and stern casting deck, anglers have plenty of room and access to all locations in the water to cast their rods on the TX 175 PRO. At 17'6" in length and a beam of 84", it can comfortably accommodate up to four passengers with a maximum horsepower rating of 75.

Anglers will appreciate the versatility of the TX 175 PRO when heading out. Standard with a 24-gallon gas tank and aluminum driver/passenger seat box with seats and storage. Accommodate a full day's catch with the stern aerated livewell with divider while multiple rods can be easily stored in the lockable rod storage. There is an oversized lockable center bow storage compartment for fishing gear, accessories and stern storage for batteries.

At the helm is a full instrumentation (speedometer, voltmeter, tachometer, tilt/trim, and fuel gauge). The all-welded aluminum hull bottom features six longitudinal stringers, extruded V-stem reinforcement, and heavy-duty extruded aluminum gunnels which enhance riding comfort, reduce hull stress and increase its durability.

Since 1951, Polar Kraft boats have been designed and engineered by highly skilled craftsmen that are passionate about fishing. Polar Kraft offers anglers a full line of over 50 NMMA certified models of tough aluminum fishing boats to fit a variety of fishing interests. Polar Kraft is manufactured by Godfrey Marine, one of the largest recreational boat manufacturers in North America.
